# THE BASIS FOR THE ULTIMATE SPORTS EXPERIENCE, THE FLOOR IS YOURS!

## THE FLOOR IS YOURS!

Pulastic® sports floors are the ideal support for athletes who demand the utmost of themselves. The optimum properties, various sports performances and choice of elements for selecting the right flooring are made easy for you. Choose an all-rounder, powerhouse or showpiece.

## THE POWER OF PULASTIC® FITNESS FLOORS

By using a durable and recycled rubber base mat and polyurethane top layers, a Pulastic® floor is extremely strong, durable and comfortable. Pulastic® floors are available in many innovative fitness floor solutions, which stand out in eight areas.

### 1. ULTIMATE SPORTS EXPERIENCE

A Pulastic® fitness floor is very comfortable and safe and contributes to fewer injuries and more well-being. And above all, the right floor is available for every application.

### 2. STRONG

Pulastic® fitness floors are very suitable for intensive use. Due to the strength of the material, the floors are highly resistant to loads from weights and fitness equipment.

### 3. SEAMLESS

Pulastic® fitness floors have an attractive and aesthetic appearance without seams. They are maintenance-friendly and easy to clean.

### 4. FREEDOM OF DESIGN

Pulastic fitness floors can be perfectly matched to the look and feel of the fitness club, thanks to infinite possibilities with colours, patterns, logos.

### 5. COST-EFFICIENT

After many years of intensive use, colour and pattern changes can be made quickly without loss of quality. The end result is seamless and is experienced as a brand-new floor.

### 6. SOUND-ABSORBANT

Optimal acoustics are achieved by using elastic materials. An optional, acoustic subfloor ensures that impact and airborne noise are dampened.

### 7. SUSTAINABLE

Pulastic® fitness floors consist of recycled rubber and renewable materials. In this way, they contribute to the sustainability of the fitness club.

### 8. COMPLIANCE

Pulastic® fitness floors meet the strictest requirements in terms of fire safety and indoor air quality, in accordance with international building regulations and certifications.
