INTENSE

For intensive use and optimal support under all conditions. Made to withstand high impact. Strong in simplicity, simply strong. Go INTENSE!

WORKS FOR

FUNCTIONAL TRAINING ZONES
HEAVY WEIGHT ZONES
GROUP TRAINING ZONES
CARDIO ZONES

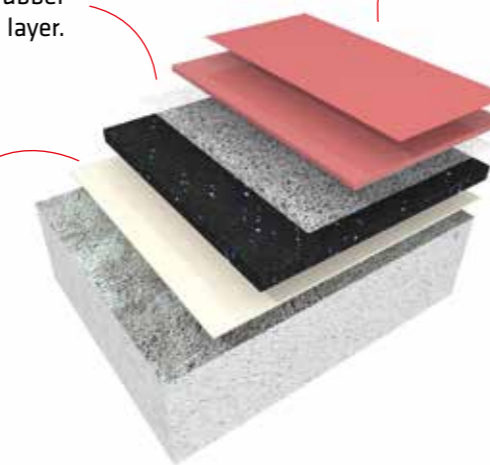

FACTS

NOMINAL THICKNESS: 10 MM
TYPE: POINT-ELASTIC

Flexible sealing layer as a connection between the rubber base mat and the top layer.

High-quality, durable, seamless and resilient 3 mm top layer for impact resistance.

Extremely strong adhesive anchors the fitness floor to the subfloor.

7 mm recycled rubber base mat, with reinforcing flakes, ensures a high density and thus optimal resistance to for example falling dumbbells/kettle bells.

GIVE YOUR ATHLETES THE STAGE THEY DESERVE

Physiotherapists and players compliment the high quality of execution and comfort of the Pulastic fitness floors. Pulastic fitness floors are easy to maintain and, in the chosen colour scheme, they contribute to a robust and top-quality look.

IMPLEMENT YOUR BRAND IDENTITY

The Pulastic team has extensive experience and knowledge in specialised products and systems and is continually looking to push the boundaries of what is possible with flooring and bringing design and technology to the fitness markets.

The option to supply and install customized and brand identity flooring to a global market is the perfect choice for Escape. The range of systems, colours, and hygienic surfaces offered, set Pulastic apart from other companies in the market.

PAUL LIPSCOMBE

International flooring manager - Escape Fitness (UK)

EIGHT TOP

PERFORMANCES OF PULASTIC

The power of Pulastic fitness floors? By using a sustainable and recycled rubber base mat and polyurethane top layers, Pulastic is extremely strong, durable and comfortable. Available in many innovative fitness floor solutions, which distinguish in eight areas.

ULTIMATE SPORTS EXPERIENCE

A Pulastic fitness floor is very comfortable and safe, contributes to fewer injuries and more well-being. The energy return makes every workout even more intense. And above all, the right floor is available for every application.

STRONG

Pulastic fitness floors are very suitable for intensive use. Due to the strength of the material, the floors are highly resistant to loads from weights and fitness equipment.

SEAMLESS

Pulastic fitness floors have an attractive and sleek appearance, without seams. Liquids do not get a chance to penetrate the floor. This is due to the closed surface. The fitness floors are maintenance-friendly and easy to clean.

FREEDOM OF DESIGN

Pulastic fitness floors can be perfectly matched to the look and feel of the fitness club, thanks to infinite possibilities with colours, patterns, logos. In addition, the Pulastic top layer is UV-tested, and is therefore colourfast.

COST-EFFICIENT

Any repairs are cost-efficient and easy to carry out. Furthermore, Pulastic floors have a long service life. After many years of intensive use, colour and pattern changes can be made quickly without loss of quality. The end result is seamless and is experienced as a brand-new floor.

SOUND-ABSORBING

Optimal acoustics due to the fact that Pulastic fitness floors are made of elastic materials with energy and vibration absorbing properties. The optional, acoustic subfloor also ensures that impact and airborne noise is dampened and noise nuisance is prevented.

SUSTAINABLE

Pulastic fitness floors consist of recycled rubber and renewable materials, such as castor oil. In this way, they contribute to the sustainability of the fitness club and favourable scores for sustainability programmes.

COMPLIANCE

Pulastic fitness floors meet the strictest requirements in terms of fire safety and indoor air quality, in accordance with international building regulations and certifications.

The fitness industry is very dynamic. With the Pulastic brand Sika is the perfect partner and takes an active constructive approach to the continuous adjustment of our Pulastic fitness floors.

In addition, the durability, appearance and sports safety of Pulastic is of great value to us.

ALL ZONES
GROUP TRAINING ZONES
FUNCTIONAL TRAINING ZONES
SPINNING ZONES

FACTS
NOMINAL THICKNESS: 47 MM
TYPE: AREA-ELASTIC

Perfectly coordinated top layers ensure an optimal light experience.

Professional and safe LED technology is the basis for a long service life and ultimate fitness enjoyment.

Cleaning has no effect on the integrated LED lighting because of the seamlessness.

The "BOOST" fitness floor is the solid basis for the FREESTYLELED and takes the experience to an even higher level.

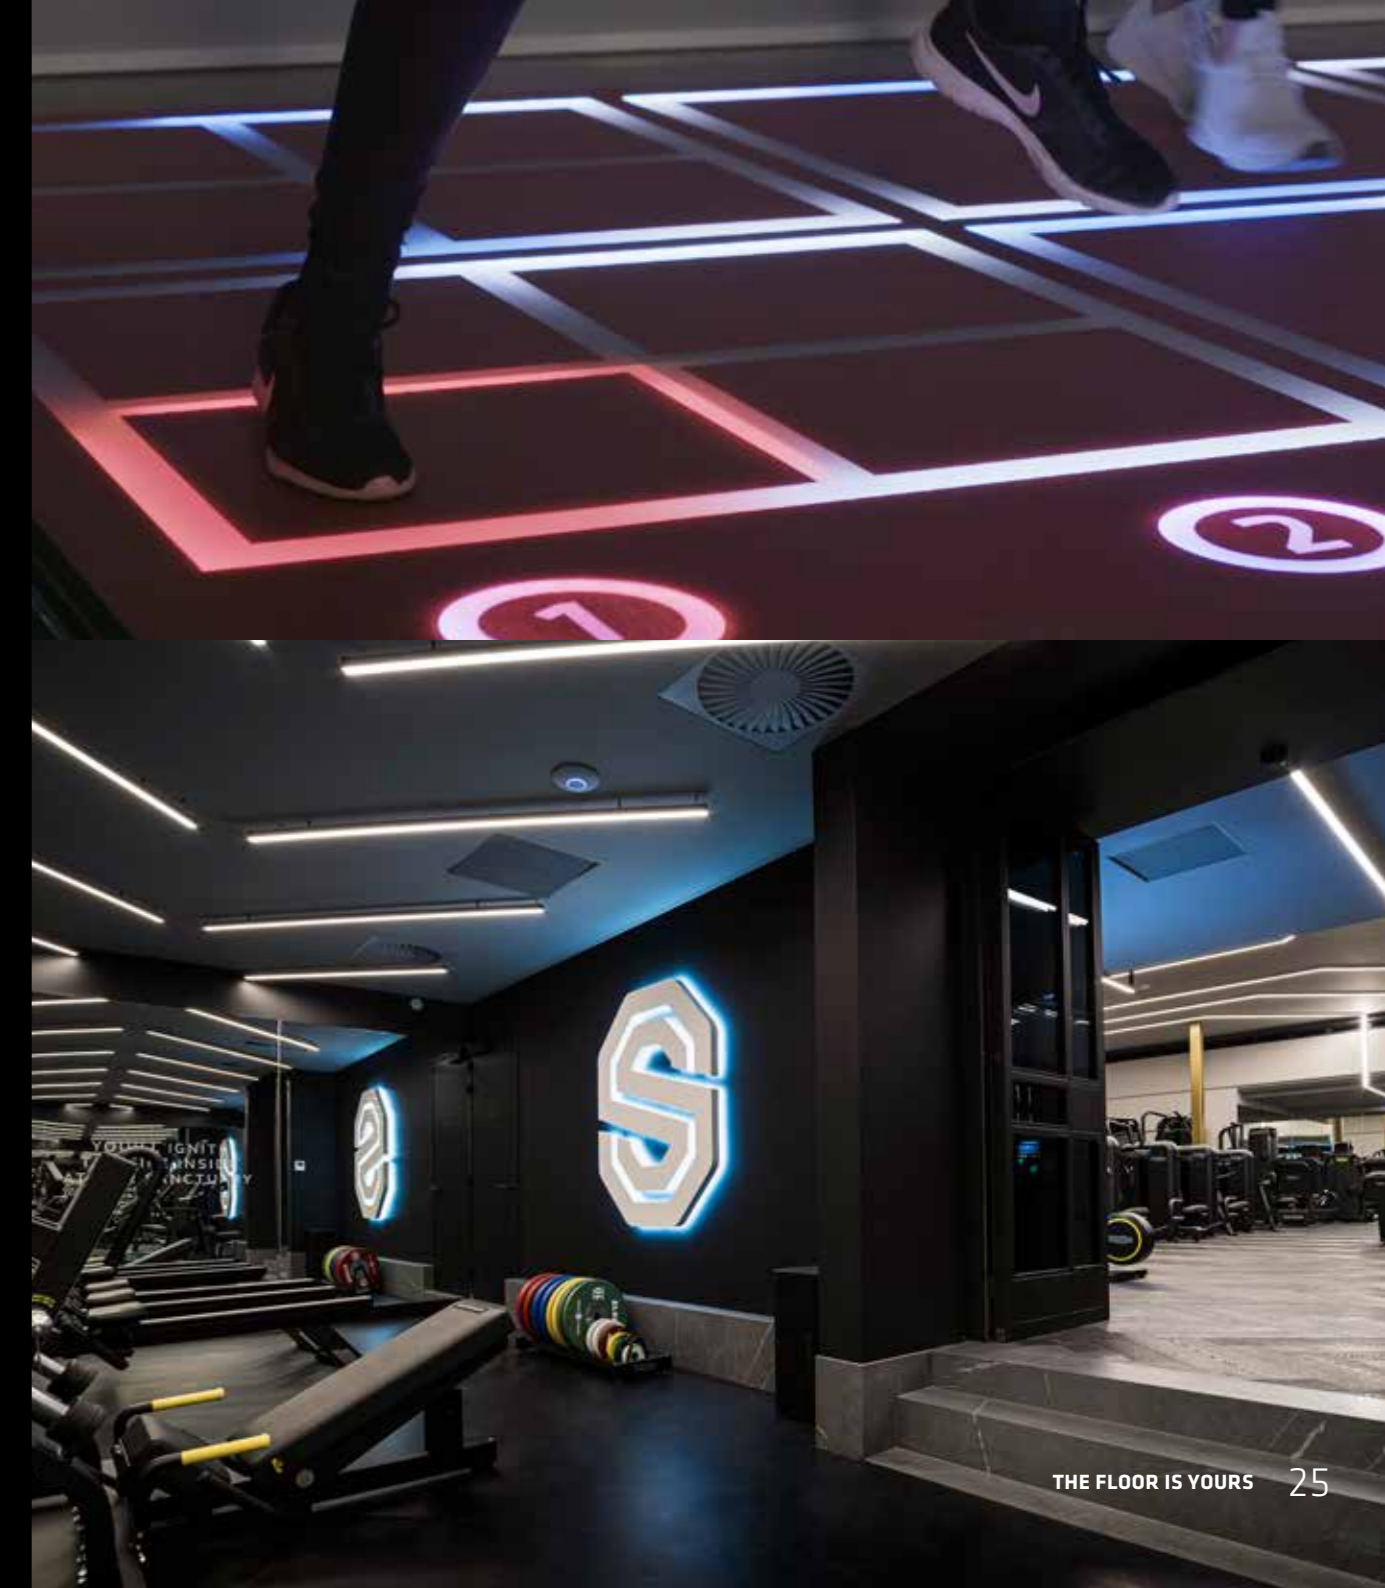

Saints & Stars - Amsterdam

Pulastic fitness floors retain their formidable appearance and strength even after 10 years of intensive use. In addition, Pulastic has taken a substantial lead in terms of innovations that have created the ultimate fitness experience for our members with the FREESTYLED solution.

COUNTLESS DESIGN

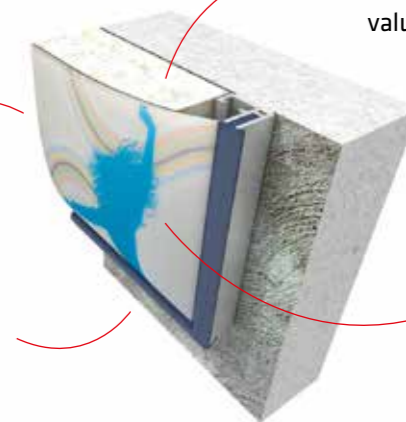

POSSIBILITIES

PULASTIC SOUNDWALL

Combine the Pulastic fitness floor with the Pulastic SOUNDWALL and create the ultimate fitness room! Make a statement through the freedom in design and experience the optimal acoustics. Let's hear it for our SOUNDWALL!

Detailed prints for inspiring and visually appealing effects.

Excellent colour fastness due to the unique fibre printing method.

Due to the ingenious composition of the various materials, the sound absorption values are "best in class".

Soft touch materials, strong enough to withstand high impact.

INVISIBLY AWESOME

The acoustic floor solution is fantastic. Our lessons can continue at any time, without disturbing the surrounding apartments. As a result, our members can give their all during our group lessons.
